EDUCATION

- 2023-2026** HIGHER TECHNICAL DEGREE IN DATA SCIENCE AND AI
IFTS nro 24 (finished)
- 2008** SECONDARY TITLE IN EXACT SCIENCES Juan Bautista Debrabant

CERTIFICATIONS

- 2026-** DATA SCIENCE
Digital House
- 2024-** DATA ANALYTICS
Coderhouse
- 2023-2024** POWER BI
Coderhouse
- 2022 - 2023** JAVASCRIPT PROGRAMMING
Coderhouse
- 2021-2022** CUSTOMER EXPERIENCE CERTIFICATION
Coderhouse
- 2021-2022** PRODUCT MANAGER CERTIFICATION
Coderhouse

SUMMARY

Higher Technical Degree graduate in Data Science and Artificial Intelligence with experience in data analysis, transformation, and visualization to support business decision-making.

Currently developing analytical solutions for Customer Experience, integrating multiple data sources and applying Python, SQL, Power BI, Machine Learning, and NLP. Experienced in dashboard development, exploratory data analysis, automation, and generating actionable insights for business teams.

EXPERIENCE

SSR Data Analyst- 2025 / 2026

Swiss medical

- Analyze, transform, and integrate data from surveys, customer experience metrics, and operational sources to generate actionable business insights.
- Develop Power BI dashboards to monitor KPIs and Customer Experience metrics (NPS, CSAT), supporting data-driven decision-making.
- Perform Exploratory Data Analysis (EDA) to identify patterns, trends, satisfaction/detractor drivers, and improvement opportunities.
- Develop analytical and Machine Learning models to identify factors associated with customer churn, integrating customer data with Customer Experience metrics.
- Automate qualitative feedback processing and analysis using Python and Natural Language Processing (NLP) techniques.
- Integrate and analyze multiple data sources to identify relationships between customer behavior, experience, and operational variables.
- Present findings through data visualizations, dashboards, and executive reports, translating analytical results into recommendations for business teams.

Technologies: Python | SQL | Power BI | Pandas | Scikit-learn | NLP | Excel | Qualtrics | MicroStrategy

Data Analyst Axon Training

2023 / 2025

- Developed Power BI dashboards to monitor business and marketing KPIs, including channel performance, conversion, and customer journey metrics.
- Built and analyzed digital reports in Looker Studio, integrating Google Analytics and other data sources to evaluate channel performance, traffic, and user behavior.
- Analyzed customer behavior across the funnel, identifying friction points and opportunities to optimize conversion.
- Performed exploratory data analysis (EDA) to identify behavioral patterns and generate actionable insights.
- Conducted customer segmentation using analytical techniques and clustering algorithms, identifying user groups based on behavior and engagement to improve marketing strategies.
- Generated insights for marketing and business teams, aligning experience metrics with commercial objectives.
- Applied analytical methodologies (Lean, DMAIC) to identify root causes and optimize processes and performance.

TOOLS: *Power BI, SQL, Google Workspace (Paquete Office), Miró, CRM, Metodologías ágiles, Looker/Google Data Studio GA, GTM*

Issuing Customer Experience Analyst -2021/2023 Global Processing (Fintech – Payment Processor)

- Provided technical support and handled customer inquiries, ensuring high levels of client satisfaction.
- Monitored and managed incidents, coordinating with internal teams to ensure timely resolution.
- Analyzed client requirements for new functionalities and translated them into technical specifications.
- Collaborated with cross-functional teams to ensure project delivery aligned with client expectations.
- Analyzed customer feedback and behavior to identify improvement opportunities in products and services.
- Trained clients on the use and integration of payment platforms.
- Managed projects and coordinated improvements across different areas.
- Proposed process improvements to optimize operations and reduce errors.
- Maintained ongoing communication with clients regarding project progress, resolution timelines, and improvement strategies.
- Defined and documented the scope of requested changes.
- Developed reports and analyzed metrics such as NPS and resolution time, identifying behavioral patterns and improvement opportunities.

TOOLS: *Excel, TeamQuality: Crediware, Infinitus, SmartOpen Manage reports, APIS and batch processing, Postman, Trello, JIRA*

SKILLS

Scrum | Slack | Miro | SQL | Jira | Google Workspace | Excel |
Power BI | Web Analytics | Quicksight | Miro | CRM | Python |
Google Ads | GA | GTM | Looker (ex Google Data Studio) | Pandas
| Numpy | Scikit-learn | LLMs | NLP
